

Managed Compliance Service

Our Managed Compliance Services allow you to focus on your business with the peace of mind that your Quality, WHS and Environmental management obligations are being taken care of by qualified, dedicated experts...

The obligations around managing compliance with health, safety, environmental and quality (HSEQ) can at times seem overwhelming. You may have systems already in place, but are not sure they are being managed correctly, you may know you need to do something about it, but don't know where to start. Clarity can help!

With our managed compliance service, you can select the level of support you want to achieve peace of mind that your obligations are being met. Our compliance systems management covers:

- Work Health Safety
- Quality Management
- Environmental Management
- Emergency Response Planning and Management

We have qualified, experienced support that can work with you and your business to ensure you have the right systems in place to provide a safe, professional and sustainable workplace.

Our three-tiered approach allows you to dial up the level of support you need:

Compliance Coaching – You have good systems in place and you have internal people managing them but as a business owner you want to have available advice and information for yourself and your staff about updates to legislation and standards, an external or objective point of view on a particular Quality, Safety or Environmental matter or want advice on how to effectively implement a change or an update to your system.

HSEQ Self Service – You have systems in place and have appointed an internal person/s to manage but they need help in making sure that everything is being managed correctly to ensure compliance with regulations. This service provides off site and on-site support* to make sure that the right records are being kept and maintained, that you have a clear picture of your Quality/Safety or Environmental performance and your internal staff are well supported with the latest information.

We will help your team manage their required activities, incident investigation, risk assessment support, policy reviews, internal audits and preparation for external audits and provide regular topics for Toolbox Talk Topics and Safety Focus Training.

HSEQ Fully Managed – Clarity will provide you with a compliant Quality, WHS and Environmental management system and will manage it for you. We will conduct WHS site inspections, internal audits, be available for external system audits.

manage incident investigations, conduct risk assessments, deliver HSEQ related training, develop documentation and provide HSEQ Performance reports to the Executive level of the business so that they are fully informed about the state of their HSEQ compliance and you can get on with managing day to day operations confident that in terms of Quality, Safety and Environmental Management, you have everything under control.

Business and IT Solutions

Perceptive Thinking | Clear Direction | Focused Delivery

Customer solution at a glance

How does it work?

Clarity will conduct an initial systems assessment to establish a baseline of your existing systems and their level of current compliance.

Using a risk based approach we will fill in any identified gaps or risks so that your systems are compliant with legislative and Standards based requirements.

We then provide ongoing support to your business to maintain your systems, based upon your desired support option.

As part of the service, you will receive an annual assessment of the health of your business's HSEQ systems and where actions or improvements are required.

What does it cost?

Compliance management is definitely not a case of "One size fits all". Different workplaces have different levels of risk that need to be factored into the HSEQ support equation.

Clarity will tailor the services provided in accordance with the level of risk associated with your workplace and how much support you believe is needed to meet your compliance obligations.

In general, our services, and your peace of mind can be delivered for about a third of the cost of a fulltime HSEQ professional and can actually reduce your current compliance costs.

When can we start?

Let's start with an initial conversation about where you think you need support.

From there we will provide you with a proposal and you can decide how best your business can benefit from the services offered.
